Education

York University

Sep 2022 – May 2027

Bachelor of Honours Software Engineering

- York University 2025 Honourable Mention Co-op Student of the Year

Experience

Jr. Developer Co-op

Jan 2025 – Dec 2025

Ministry of Children, Community and Social Services

- Customized **Siebel CRM enterprise applications** by configuring LOVs, data fields, mappings, and application components to support business and operational requirements.
- Supported **enterprise analytics and reporting solutions** using **Oracle Analytics Server (OAS)** and **Oracle Analytics Publisher (OAP)**, integrating application data into reporting workflows and business-facing letters and forms.
- Developed and optimized **OAS reports, letters, and forms**, validating data mappings and output to improve data accuracy, reporting reliability, and compliance with enterprise standards.
- Participated throughout the **Agile systems development life cycle**, including requirements analysis, development, verification and validation, testing, deployment, and production support in accordance with **OPS I&IT standards and processes**, and ensure **production-ready releases**.
- Improved production troubleshooting by integrating **Siebel session-log analysis with OpenSearch**, enabling developers to investigate application issues independently and reducing reliance on Middleware support.

Machine Learning Intern

May 2024 – Sep 2024

Laboratory of Advanced Biotechnologies for Health Assessment

- Led the analysis of high-dimensional dataset (30k-50k features) using **Python** and libraries including **Pandas, NumPy, scikit-learn, TensorFlow, and PyTorch** to develop **ML models** for early diagnosis of neurological diseases.
- Employed **DBSCAN** and **K-means clustering algorithms** for 4D complex patterns in chemical crystal structures.
- Utilized **U-Net** for 3D mice brain image segmentation and data augmentation.
- Applied **transfer learning** and **fine-tuning** techniques to adapt tumor detection models from mice to human datasets.

Arduino Programmer

May 2023 – Sep 2023

Research At York (RAY)

- Developed **C++** programs for **IoT sensor networks**, real-time **embedded hardware & communication systems**.
- Created **Python** scripts for real-time data acquisition and **image processing** among laser systems and sensors.
- Collaborated with **stakeholders & cross functional team** to define technical milestones, refine experimental requirements, and deliver working prototypes on schedule.

Projects

Atlas Library Chatbot | [GitHub](#) | [Demo](#)

- Developed an AI-powered chatbot using **TensorFlow** to assist users with resource discovery and data retrieval within York University's library system for **C4 Capstone project**.

Imposter Getaway Game | [GitHub](#) | [Demo](#)

- Led the **opening ceremony** of Branch Day on by welcoming staff, **designed and programmed** an interactive icebreaker **game app** that boosted engagement and encouraged cross-team collaboration.
- Built the app using **JavaScript, React.js**, and **Firebase** for real-time database management.

Plannect | [devpost](#)

- Won **first place** at **Elle Hacks Hackathon** for a web app that uses AI to connect users locally with others who share similar passions.
- Developed the frontend using **ReactJS** and MapBox API, while the backend was built with **Express/Node.JS**, Autocode, GPT-3, and Typeform Responses API to generate personalized matches based on user inputs.

Technical Skills

Data & Analytics: SQL, Oracle Analytics Server (OAS), Oracle Analytics Publisher (OAP), Pandas, NumPy, scikit-learn, data analysis, data integration, data validation, data visualization

Languages: Python, Java, JavaScript/TypeScript, C/C++, React.js, Node.js, Linux Shell Scripting

Tools & Frameworks: Django, Git, PostgreSQL, Rest APIs, Jira, Bash, MS Tools, Figma, Wix
